FOR IMMEDIATE RELEASE

April 22, 2010

### **DEEZA CHASSIS PARTS ADOPTS ENVIRONMENTALLY FRIENDLY PACKAGING**

*All products packed and sealed into biodegradable, moisture preventative bags*

**Totowa, NJ** - Deeza Chassis Parts, a technology focused manufacturer of premium chassis parts for the global aftermarket, recently adopted environmentally friendly packaging for all of its products. The company now places all of its metal parts into anti-corrosive packages before shipping to ensure they remain rust-free during transportation and storage. The moisture preventative bags help protect against humidity and salt, contain no nitrates or phosphates, and are completely biodegradable. Each bag is then packed into a Deeza logo box for shipment.

"Deeza is committed to reducing our environmental impact," said Gokhan Kuru, president, Deeza Chassis Parts. "We were faced with the challenge of making sure customers receive corrosion-free parts when they open our package, while sending it to them in packaging that is friendly to the environment. We feel we've been able to achieve these goals and will continue to innovate long-term, sustainable solutions."

For more information about Deeza Chassis Parts, phone (973)237-1101, email [info@DeezaChassis.com](mailto:info@DeezaChassis.com), or visit [www.DeezaChassis.com](http://www.DeezaChassis.com).
