Disa Automotive Opens U.S. Distribution Center

[Print](#) [Send](#)

In [January 10, 2008](#) / [default](#)

Turkish chassis manufacturer Disa Automotive, a private brand supplier to the European and North American aftermarket, has announced it will begin distributing products in the U.S. under the brand names Deeza and Deeza Chassis Parts. In conjunction, the company has opened a warehouse and distribution center in Totowa, NJ, which will serve as the hub for its U.S. warehouse operations.

Disa owns two production plants and sales headquarters in Turkey and is ISO 9001:2000 quality certified. The company serves customers in more than 23 counties and has annual sales of more than \$15 million.

Deeza boasts more than 2,500 items in its product portfolio including stabilizer links, inner tie rod ends, outer tie rod ends and control arms for North American, European, Japanese and Korean passenger cars and light commercial vehicles for model years 1980 to 2007. The company provides 100 percent coverage on stabilizer links and inner tie rod ends. All Deeza products are manufactured in Turkey.

Deeza also offers North American aftermarket customers with AAIA Legacy, ACES and PIES compliant vehicle application and extended product information for its chassis parts.

While the products are available under Deeza brand name, private branding is also available through Deeza New Jersey warehouse.

For more information about Deeza, go to: www.DeezaChassis.com.
